

*“The team did a complete walk through of my store and provided a written assessment. Their 8-page report was well done, and provided excellent recommendations. Their report showed where we are strong and where we could improve. I really appreciated their approach and process and would HIGHLY recommend the FFL Risk & Security Assessment.”*

**Richard Sprague,  
Sprague’s Sports**

*“The consulting team did a very thorough and professional audit of our facilities, current security policies, and operating procedures. The recommendations that were given during the audit and the follow up report shed a new light on aspects of physical security we hadn’t previously considered. I appreciated the candid and specific feedback we received throughout. This is a fantastic program that I would highly recommend to help any business in the firearms industry address any physical security concerns it had.”*

**Michael Anderson  
Director of Compliance**

*“The consultant reviewed all of our security controls and gave us constructive criticism based on his experience. His recommendations on how to reduce loss, both internal and external, were very informative and specific. He has a vast knowledge of tactics used by criminals in a retail setting. More importantly he gave us peace of mind when it comes to the integrity of our staff. He was very professional and very specific with his findings in the report he prepared for us.”*

**Ben Romanoff  
Ace Sporting Goods**

# FFL RISK & SECURITY ASSESSMENT

## OPERATION SECURESTORE™

NSSF’s new assessment program will provide a thorough review of security protocols from the perimeter of your facilities through your internal operational controls in order to ensure criminals don’t see your business as an easy target.

**This program is designed for  
retailers, ranges, distributors  
and manufacturers.**

**For more information or to schedule  
your assessment today, contact:**

**John McNamara,  
Senior Director, Retail Services**

☎ 203-426-1320

**W**hen was the last time you tested your alarms, reviewed your security procedures with your team, spoke to local law enforcement about crime trends or reviewed your disaster recovery plan? Our team will review the latest loss prevention technology, crime trends, and tactics to combat theft, while also covering your businesses internal inventory controls, information security, employee safeguards and disaster preparedness.

NSSF's team of loss prevention and security experts have an average of 25 years' experience and will work with your team to harden your business in the most economical method possible.

### CONSIDER THIS...

As an FFL you have a professional obligation to ensure your firearms don't make it into the hands of criminals.

Far too many FFL burglaries that occur could have been prevented by improved safeguards.

### YOU'LL LEARN:

- How to conduct your own security review of your building premises and internal processes.
- Strategies for improved security and risk management.
- A comprehensive review of store security technologies and practices.
- What solutions are available to implement layers of security
- Simple low cost and low tech improvements

### RISK & SECURITY ASSESSMENT:

- Shows how to enhance the protection of your people, property and profits.
- Offers industry-leading strategies for improved security and risk management.

- Provides a comprehensive review of physical and digital security technologies and practices.
- Increases your security and safety knowledge to prevent future criminal acts.
- Offers cost-effective strategies to create deterrent "layering" of security strategies.
- Enlightens your leadership team with firearm and retail industry tactics for improved risk management.
- Is designed for startups, existing or mature business or post burglary business recovery
- Should be included in every post-burglary recovery plan.

**The Security Assessment is perfect for any range owner, retailer, distributor or manufacturer.**

This day long training will cover a thorough review of the following key parts of your business.

- Access Control Systems
- Intrusion Detection Systems
- CCTV System Review, inclusive of Camera Type and Placement
- Information Security & Document Management

- Lock and Key Management
- Perimeter and Property Security
- Safety Systems (fire suppression, backup power)
- Visitor Entry and Verification Procedures
- Emergency Management
- Personnel Security
- Inventory Management & Control
- See your security through the eyes of an industry expert
- Receive professional recommendations for improved and affordable security that makes sense
