

## **RemArms LLC to Consolidate Firearms Operations in LaGrange, Georgia**

**LaGrange** – November 30, 2023 – The iconic Remington Firearms brand was founded in 1816, and today Remington Firearms (RemArms) operates as one of the United States' largest domestic producers of shotguns and rifles. Chief Executive Officer, Kenneth R. D'Arcy today announced that RemArms, America's oldest firearms brand, will consolidate its firearms operations in LaGrange, Georgia. This will align all firearms manufacturing with our planned global headquarters and world class R&D facility in Georgia, which supports and welcomes the firearms industry.

"We are deeply saddened by the closing of the historic facility in Ilion. We have a dedicated workforce at the Ilion facility, but maintaining and operating those very old buildings is cost prohibitive, and NY's legislative environment remains a concern for our industry. In the coming months, we expect to be working with our Ilion employees and their representative on transition issues." said Ken D'Arcy, RemArms CEO.
